Here are 10 orthopedic and spine physician leaders.

**Tal S. David, MD, of Arthroscopy & Orthopedic Sports Medicine Associates in San Diego.** Referred to as "soccer savior" by one of his patients, Dr. David has proven his leadership among orthopedic surgeons by performing ACL reconstructions using the AperFix system. In addition to treating his patients, Dr. David is a clinical instructor in the department of orthopedic surgery at the University of California, San Diego, and serves on the North American board of editors for *Orthopedics*.

**Lawrence D. Dorr, MD, of Dorr Arthritis Institute in Los Angeles.** Dr. Dorr was recognized as the Humanitarian of the Year in 2006 by the American Academy of Orthopaedic Surgeons for his work with the Operation Walk. He is the current president of the Hip Society as well as a past president of the Knee Society and the American Association for Hip and Knee Surgeons, both of which he founded. He is currently the only physician who is a member of all three organizations.

**Craig Levitz, MD, of Orlin & Cohen Orthopedic Group in Rockville Centre, N.Y.** Dr. Levitz currently spreads his expertise on knee, shoulder and elbow disorders to future physicians around the world. He is lead faculty for Smith & Nephew's minimally invasive knee and shoulder surgery course and serves as consultant to other major orthopedic companies.
Kenneth Light, MD, of San Francisco Spine Center. Dr. Light recently became one of the only physicians in the United States to successfully reverse a spinal fusion. Spinal fusions were thought to be permanent procedures, until recently, and many fusions severely limit the patient's range of motion. This was the case for Dr. Light's patient, who also suffered from constant pain before the reversal.

Bert Mandelbaum, MD, of Santa Monica (Calif.) Orthopaedic and Sports Medicine Group. Dr. Mandelbaum established his leadership within sports medicine by heading a development team in creating a warm-up program specifically designed to help female athletes prevent common knee injuries. Female athletes who completed the Prevent Injury and Enhance Performance (PEP) were 1.7 times less likely to have ACL injuries than other female athletes, according to the research.

Thomas P. Sculco, MD, of the Hospital of Special Surgery in New York City. Dr. Sculco became the surgeon-in-chief of a top hospital orthopedic program when the *U.S. News & World Report* ranked the Hospital of Special Surgery in New York City as number one in orthopedics this past July. Dr. Sculco is also chairman of the department of orthopedic surgery and professor of orthopedic surgery at Weill Cornell Medical College in New York City.

James St. Louis, MD, of Laser Spine Institute in Tampa, Fla. Dr. St. Louis is the founder and chief physician at Laser Spine Institute in Tampa, Fla. He is committed to providing his patients with the best treatment possible for spinal injuries and disorders. He has consistently been on the cutting edge of minimally invasive spine surgery techniques and has trained many young physicians on innovative surgical techniques throughout his career.

Richard Steadman, MD, of The Steadman Clinic in Vail, Colo. Dr. Steadman has treated patients and professional athletes for more than two decades at The Steadman Clinic in Vail, Colo., which he co-founded with Richard Hawkins, MD. Dr. Steadman focuses on treatment for knee injuries and is currently treating famous patients such as Ryan Sweeney of the Oakland Athletics and Owen Hargreaves of Manchester United.
